

EuroVanillin **SUPREME**

	EuroVanillin Supreme	Other bio-based vanillin	Synthetic oil-based vanillin
Plant-based raw material/100% biogenic carbon	✓	✓	✗
Certified sustainable raw material	✓	✗	✗
CO ₂ footprint below 1kg CO ₂ -eqv/kg product	✓	✗	✗
Pure creamy flavour with no sidenotes	✓	✗	✗

The demand for bio-based and plant-based ingredients is growing as environmental expectations increase. However, plant-based ingredients are not always better for the environment, and they don't automatically give better aroma performance.

Located in Norway, close to forests and rivers, Borregaard has supplied the plant-based EuroVanillin Supreme to customers worldwide since 1962. With Supreme, there is no need to compromise; it hits the sweet spot of a plant-based ingredient with the lowest CO₂ footprint from certified raw materials, while delivering a smooth, creamy vanilla note to your end product. Certified according to ISO 16128 and FSSC 22000, and supported by a third-party LCA, we confidently claim that Supreme is a superior choice, both for your application and for the environment.

EuroVanillin Supreme is sold both as a standalone product but it is also used as a central ingredient in our wide range of high intensity flavours.
